Greetings.

My name is Konstantinos Grousouzakos and I am aspiring to become a Data Analyst/Scientist.

My educational background consists of a Bachelor's in Mechanical Engineering and a Master's in Industrial Engineering.

My passion for statistics and data driven decision making has led me to choose the profession of Data Analyst/Scientist as the one that fits best to my temperament, personality and natural skills.

In this portfolio, you will find projects that I did on my own, such as EDA, predictive, classification and clustering ML models etc.

The portfolio will be regularly updated.

Any feedback is welcome 😊!
